Uncompromising quality and customized helicopter completions
for corporate and executive aircraft.

Corporate Completions

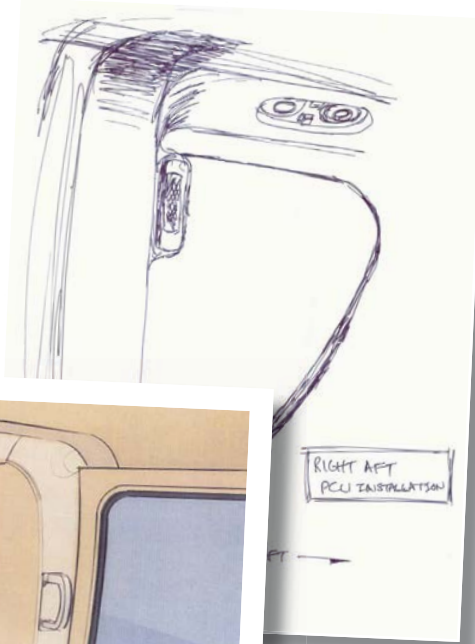

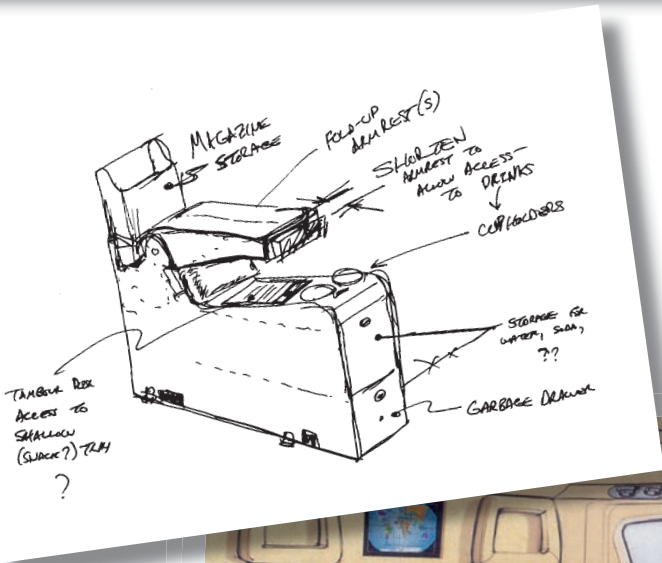

Metro Aviation, Inc., is proud to have performed completion services for several Fortune 500 companies over the last five years. Being selected by these companies speaks volumes for the type of service Metro Aviation has become noted for in other helicopter completion services.

Uncompromising quality, attention to detail and flexibility in meeting and exceeding the customers' expectations is the norm for this service.

The beauty of Metro's work is not just skin deep. Every wire, paint stripe, seam and cabinet veneer is finished under the surface as perfectly as it is on the surface. Flawless design and appearance has no value if the functionality and reliability is in question. Maintenance personnel and pilots alike have input into the completion and are provided access to the aircraft as many times and in as much detail as they require to assure in-depth knowledge of systems and operation.

Worldwide customers and aircraft placements demand 24 hour support, which we provide out of our Shreveport facility. Metro not only services the installed equipment but also services the airframe and power plant, making us a one-stop solution for tip-to-tail support.

Services including custom paint, upholstery, interior matching to existing customer jet aircraft interiors, high quality finishes, custom cabinet work (fitting the cabinet and amenities to the person - not the aircraft), is essential.

Additional Services

- Paint and paint design
- Plating service
- Interior design and fabrication
- Avionics installation
- Airframe factory optional equipment installation
- Maintenance services

REFURB LITE SERVICES

Metro Aviation offers, at no additional cost, an aircraft refurbishment program as defined below for any total helicopter completion performed by Metro Aviation.

The REFURB LITE program is a feature designed to enhance aircraft residual value and to offer our customers an additional measure of confidence when selecting Metro Aviation helicopter completion services.

REFURB LITE

- Touch up of exterior paint and placards
- Refurbishment of all seats originally upholstered by Metro Aviation as part of the initial completion
- Replacement of all pouches and storage pockets manufactured as part of the original installation
- Thorough cleaning and/or repainting of interior paneling and Metro Aviation manufactured cabinetry
- Incorporation of all Metro Aviation produced and installed STC equipment product improvements developed since the original installation
- Pitot Static and altimeter recertification (IFR)
